DETAILED ACTION

Allowable Subject Matter

Claims 6-7, 9-14, 16, 19-26 and 28-33 are allowed.

The following is an examiner's statement of reasons for allowance:

Re claims 6-7, 9-14, 16, 19-26 and 28-33, the prior art fails to teach or suggest, "A method and device for fixed pattern noise correction of image signals generated by image cells of an image sensor, comprising the following steps, a) determining in which value range out of at least two value ranges a value of an image signal is located at a predetermined instant of time; and b) determining a corrected value for the image signal as a function of the result according to step a), wherein the step of determining the corrected value according to step b) comprises the substeps of b1) selecting correction coefficients from a plurality of sets of correction coefficients as a function of the result according to step a); and b2) calculating the corrected value for the image signal by using the selected correction coefficients, wherein said correction coefficients are determined from a comparison of an actual characteristic, which specifies a relationship between an optical intensity impinging on the respective image cell and the image signal generated, with a nominal characteristic, for each image cell, and wherein the at least two value ranges are specified such that the actual characteristics and the nominal

characteristic each are approximately linear with respect to the logarithm of the optical intensity impinging on the image cells within the respective value ranges, **wherein, for each image cell and for each of the at least two value ranges, the corrected value for the image signal is determined from an actual value generated by the image cell based on a transformation equation of the following form: $V_c = (a * V_r) + b$, where V_c is the corrected value for the image signal, a and b are correction coefficients of the transformation equation that are determined from a comparison of the actual characteristic and the nominal characteristic, and V_r is the actual value generated by the image cell".**

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
